

The Risk Management Committee's Report

In 2018 many changes and new situations did occur regarding politics, international trades, rules and regulations, global environmental issues, population structure amidst the rapid and widely spread of Digital Technology, leading to the fast behavior changing among consumers. Such changes have provided new opportunities alongside certain threats towards all current businesses so that the business way forward needs as well rapid adaptation.

The Company, therefore, focuses on those risks which directly affect our business competitiveness and the sustainable growth factors. Accordingly, various risk-impacts have been integrated under the risk mitigation strategy with responses towards new business opportunity following those changes. We concentrate on building various client bases, launching new products, Supply Side Logistics and exchange rate management on top of those various risk management continually handled since the previous year.

Moreover, the Risk Management Committee has reviewed its charter to enhance complete operation and submitted the report of the overall organization risk management to the attention of the Company Board & Directors regularly.

(Dr. Atthakorn Glankwamdee)

Chairman of the Risk Management Committee
