

Announcement

Environmental Policy

The company has aimed to produce quality products while recognizing the significance of running a business that impacts the environment and resources, starting from the source of raw materials, production processes, storage, and delivery of products through to the end user. With the intention of preserving the environment, the Company has established guidelines as follows:

1. Comply with laws, customer requirements, treaties, and environmental standards, both at present and that may occur in the future.
2. Manage with a focus on reducing resource use, reusing, and recycling, including preventing and eliminating things that cause environmental pollution.
3. Aim to continuously develop and improve environmental capability to create environmentally friendly products in sustainable environmental management.
4. Encourage considering the life cycle to achieve the most efficient use of resources.
5. Encourage reducing the use of resources and products that emit greenhouse gas emissions and aim to develop for using and designing environmentally friendly products.
6. Promote employees' awareness and participation in preventing impacts on natural resources and the environment.

Announced on 1 July 2020.

(Mr.Thirasak Vikitset)

Managing Director
